10 STARS!

Dr. Chen is a great TA. His recitation lectures are helpful. He knows the content very well.

Gave helpful advice for exams and practice questions were helpful

He was a very good TA. Sometimes the professors did not do as good of a job explaining the material but David did a very good job going over the material again and explaining it in a more effective way.

Best

Dr. Chen was a excellent TA. I wish he didn't rely so heavily on the PowerPoints from Dr. Hochwagen and lecture. It would have been nice to have a more conversational recitation section. He asked questions, but then quickly moved and it made the sections feel rushed. He was certainly knowledgeable, but having the material presented in a different way or openly having a discussion about it could have been great. Overall, he was excellent and clearly showed passion for his work and the material!

Strengths: Clear presenter, condenses the lecture content well Weaknesses: Skips over some key points of the original lecture
